Hi Ed, Mike, Howard, and Gerry,

Following our meeting Friday, I reorganized the information provided regarding the KWA analysis, relative to the Slides presented by TYJT. A draft of this is attached.

I think it will be beneficial to make sure that we (the City and Rowe) agree on what level of treatment (and WTP upgrades) is needed for the different options that were analyzed, because I really think this is what makes the difference on comparing the costs. We should all be on the same page, whatever page it is.

Let me know if there are questions or if you'd like to discuss.
